9th November 2021

Dear Parent/Carer

As part of computing lessons in Year 8, students are now creating their mug label designs for their Graphics Digital Media Project. Students will be given the opportunity to design a colourful mug label, which they will then develop further using photo manipulation techniques similar to skills used in industry. Photographs of some the previous super designs are on the school website: <http://jamesbateman.staffs.sch.uk/computing/>. There will also be examples on show on our school Facebook page.

Students are also being offered the opportunity to have their final design printed on a ceramic mug for a one off payment of £4.50 for each mug. We have managed to reduce the price this year due to locating a new supplier for the printing materials.

If your son or daughter would like to purchase their own mug design, please pay £4.50 on ParentPay by 19th November 2021

Yours sincerely

Mrs L. Hibbert
Computing Teacher
